~ \$5.3 billion in Regulated Utility and contracted capital growth projects expected in 2016 - 2018

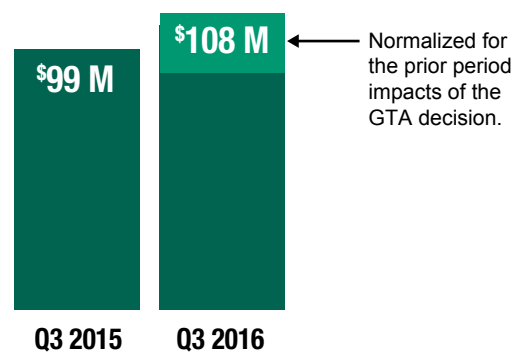

Adjusted earnings are defined as earnings attributable to equity owners after adjusting for the timing of revenues and expenses associated with rate-regulated activities and dividends on equity preferred shares of Canadian Utilities Limited. Adjusted earnings also exclude one-time gains and losses, significant impairments and items that are not in the normal course of business or a result of day-to-day operations. Certain statements in this document contain forward-looking information. Please refer to our forward-looking information disclaimer in Canadian Utilities' management's discussion and analysis for more information.

Q3 2016 RESULTS

CANADIAN UTILITIES REVENUES

CANADIAN UTILITIES ADJUSTED EARNINGS

ELECTRICITY

- Adjusted earnings were lower compared to the same period in 2015 primarily due to the prior period impacts associated with the ATCO Electric Transmission 2015 to 2017 General Tariff Application (GTA) decision received in the third quarter of 2016. Excluding the prior period impacts of the GTA decision, normalized adjusted earnings for Electricity were \$99 million in the third quarter of 2016, mainly due to continued capital investment and growth in rate base in the Regulated Utilities and business-wide cost reduction initiatives within the Electricity businesses.

ADJUSTED EARNINGS

PIPELINES & LIQUIDS

- Higher adjusted earnings were primarily due to continued capital investment and growth in rate base in the Regulated Utilities and business-wide cost reduction initiatives within the Pipelines & Liquids businesses.

ADJUSTED EARNINGS

RECENT DEVELOPMENTS

- In October 2016, the Company received the Alberta Utilities Commission (AUC) Generic Cost of Capital (GCOC) decision. The decision established the return on equity (ROE) and deemed common equity ratios for the Alberta Utilities for 2016 and 2017. The ROE remained at 8.30 per cent for 2016 and increased to 8.50 per cent for 2017. The GCOC decision also set the deemed common equity ratios for ATCO Electric Transmission, ATCO Electric Distribution, ATCO Gas and ATCO Pipelines at 37 per cent for 2016 and 2017. The 2016 and 2017 ROE and common equity ratio for ATCO Electric Transmission are approved on an interim basis, pending consideration of any relevant information obtained from the results of ATCO Electric Transmission's GTA. The allowed ROE and common equity ratios for 2017 will remain in place on an interim basis for the Alberta Utilities for 2018 and for subsequent years until changed by the AUC.
- In March 2015, ATCO Electric Transmission filed a general tariff application for its operations for 2015, 2016 and 2017. The application requested, among other things, additional revenues to recover higher financing, depreciation and operating costs associated with growth in rate base in Alberta. In August 2016, the AUC issued a decision on the GTA with final rates that are lower than the approved interim rates from 2015 mainly due to lower O&M and G&A costs. The impact of this decision was a reduction to third quarter 2016 adjusted earnings of \$15 million of which \$3 million relates to third quarter 2016 and \$12 million relates to prior periods.
