REGULATORY UPDATE

(% of 2019 Consolidated Mid-Year Rate Base)

ATCO Electric Transmission (38%) and ATCO Pipelines (14%)

Rates are spread across all customers in the province. Changes in customers' demand and use are reflected in customer transmission rates over time. **We do not expect material changes in 2020 revenue as a result of the current COVID-19 or macroeconomic global market conditions, including oil price changes.**

ATCO Gas (20%)

Operates on a revenue mechanism under PBR. ATCO Gas has some protections/adjustments on future revenue variances associated with changes in volumes or customer counts. Future changes in customer counts may impact ATCO Gas' revenue stream however, the majority of customers are residential and customer counts are not expected to change materially from the PBR2 forecast. **At this time, we do not expect material changes in 2020 revenue as a result of the current COVID-19 or macroeconomic global market conditions, including oil price changes. We continue to monitor the situation. Under PBR, there is also the opportunity to file for Z or Y factors that could include recovery of lost revenue related to events outside the control of the utility.**

ATCO Electric Distribution (19%)

Operates on a price mechanism under PBR. While the price mechanism does not offer the same adjustment or updates as the revenue mechanism for future years, ATCO Electric's rate structure currently in place utilizes a variety of mechanisms (ratchets, rate min, contract min, fixed cost recovery) to limit the exposure to demand reductions for our industrial and commercial customers. **At this time, we continue to monitor and assess any changes in 2020 revenue as a result of the current COVID-19 or macroeconomic global market conditions. Under PBR, there is also the opportunity to file for Z or Y factors that could include recovery of lost revenue related to events outside the control of the utility.**

ATCO Gas Australia (9%)

New 5-year Access Arrangement (AA5) effective January 1, 2020. AA5 ROE is 5.02% compared to 7.21% in previous access arrangement. The AA5 common equity ratio is 45% compared to 40% in the previous access arrangement. AA5 also includes rebasing of revenues for the recovery of operating costs, the approved capital expenditure program and forecast for demand and throughput. **Variables that may impact financial results include Australia's inflation rate and the exchange rate to the Canadian dollar.**

GENERAL COST OF CAPITAL PROCEEDING

CANADIAN UTILITIES' POSITION

Three Parts of a Fair Return Standard:

1. Comparable Investments

- Current capital structure and ROE does not satisfy comparable returns component
- Approved ROE's elsewhere in Canada are 9.2% on average with an average equity thickness of 43%

Canadian Utilities' application is for 40% equity thickness and 10% ROE

Canadian Utilities remains focused on maintaining prospectivity with AUC clarity on final rates prior to January 1, 2021

2. Capital Attraction

- Current capital structure and ROE do not satisfy capital attraction component

3. Financial Integrity

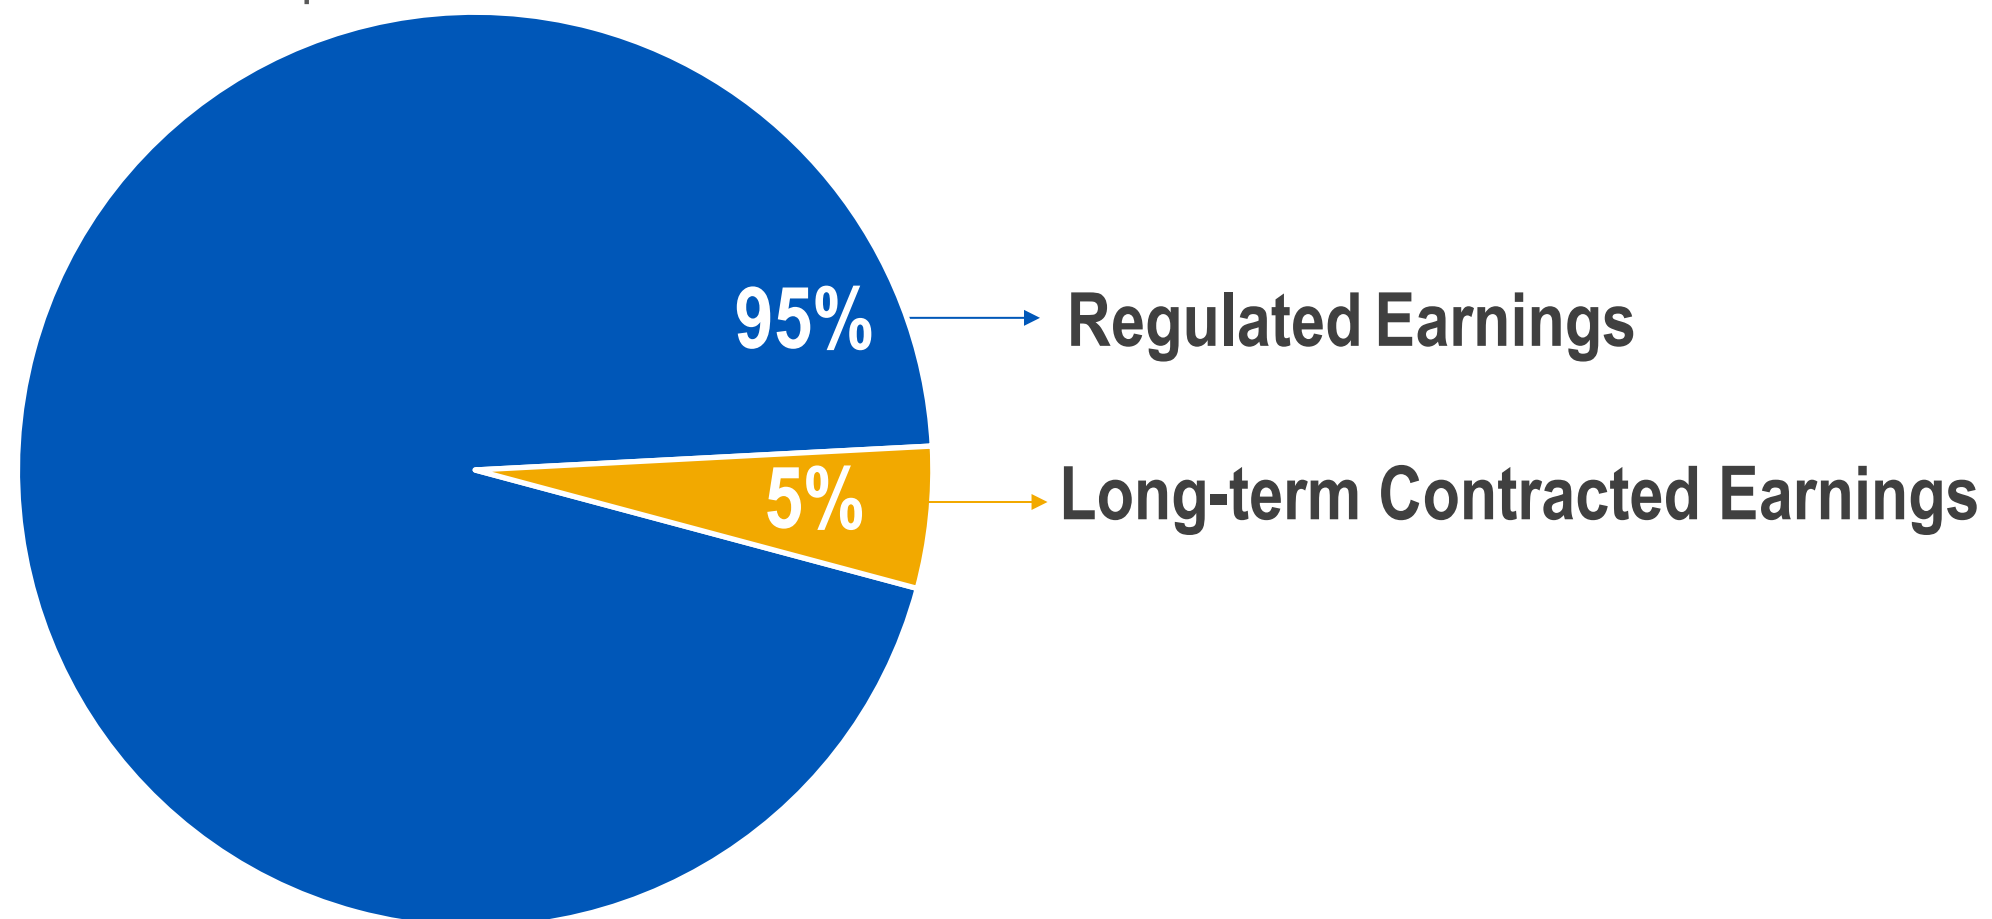

- To ensure financial integrity AUC sets the ROE and equity thickness so utilities maintain "A" range credit ratings

HIGH QUALITY EARNINGS

2019 ADJUSTED EARNINGS

\$608 Million

(+2.8% over last 3 years)**

(1) Alberta Utility Average (excluding CU) is a simple average and includes AltaGas, AltaLink, Enmax Distribution, Enmax Transmission, EPCOR Distribution, EPCOR Transmission, and FortisAlberta

(2) CU Inc. Average is a simple average and includes Electric Distribution, Electric Transmission, Natural Gas Distribution, and Natural Gas Transmission.

STRUCTURES AND LOGISTICS

- Since 2015, on-going diversification of customer base into new market segments such as infrastructure projects, public education facilities, high density residential housing, hotels and correctional facilities.
- Not reliant on O&G sector.

- Expanded and diversified geographically in new global markets in Latin America and East Africa.
- Not reliant on one region.

- LNG Canada Cedar Valley Lodge manufacturing stage substantially complete. Installation stage will be primary focus for 2020 and 2021.
 - Latest LNG Canada news can be found here: <https://www.lngcanada.ca/news/our-response-to-potential-covid-19-risks/>
- No other ATCO Structures worksites materially impacted at this time.
- Additional permanent modular construction contracts may arise and disaster and emergency management services can be provided.
